Young Investigator Award to Support Research on Team Decision-Making

More and more organizations rely on teamwork and collaboration to make decisions and solve problems. But what does it take to make a successful team? And how can organizations help these teams make better decisions?

These are some of the questions Assistant Professor Christoph Riedl will consider as he explores collaborative decision-making and related social network processes. A member of both Northeastern University's College of Computer and Information Science (CCIS) and D'Amore-McKim School of Business, Riedl has received a Young Investigator Award from the Army Research Office to support this research over the next three years. The prestigious award recognizes early-career faculty whose research shows exceptional promise.

**Students Gain Insights and Professional Connections at Google I/O Conference**

Ali Ukani and Cole Levi were lucky enough to acquire coveted tickets to Google I/O 2014 in San Francisco. But the Northeastern University College of Computer and Information Science (CCIS) seniors still had to figure out how to get there. Their good fortune continued when CCIS offered to pay their way, using a fund established by 1988 alumnus Brian Wenzinger to enable students to access learning opportunities like the Google conference for web developers.

**Data Tells Story of Career Advancement**

As Tanya Cashorali digs down deeper into data, her career is reaching new heights. Earlier this year, the 2008 College of Computer and Information Science (CCIS) graduate became vice president of product development for Comlinkdata, a Boston-based company that provides real-time market data and analysis for the telecommunications industry.
