CCIS launches six new combined majors programs with CSSH, CAMD

As college students increasingly seek out interdisciplinary programs and work to master the technical skills demanded by so many industries today, CCIS has announced five new combined major programs that will give arts and humanities students the opportunity to earn computer science credentials.

“A lot of incoming students are very interested in combining computer science with a less technical subject such as criminal justice or history,” Jessica Biron, assistant director of undergraduate programs, says. “It was all about working with departments to find some good connections between things that on the surface look like they don’t go together, but really have a lot of interesting intersections.”

Three generations of PhD students, united at Northeastern

When Sarah Brown receives her PhD in electrical engineering this December, she will be third in a line of PhD holders convened at Northeastern, and an “academic granddaughter” to CCIS Dean Carla Brodley.

“Sarah just really amazingly stood out in all ways, both for what she was doing in terms of her research and then also some of the other extracurricular activities that she’s done,” Brodley says. “I’m really proud of Jennifer and of what Jennifer has achieved with Sarah, and of Sarah herself.”

Quitting Engineering to Code

After earning undergraduate and graduate degrees in environmental engineering followed by several years working in the field, Isabel Su (MSCS ’16) needed a new challenge. She’d already tried her hand at programming, first through online tutorials, then through basic classes taken at a community college. The next step was logical - find a program that would allow her to earn computer science credentials.

Thank You

Thank you to our alumni, parents, industry partners, and friends for your support of CCIS in FY’16. Please know your philanthropic gifts are greatly valued by the faculty, staff and especially our students. The men and women who study here come from across the country and around the globe -- they are smart, curious and deserving students. Your contributions are linked to the opportunities available to them and to their success. While our institutional accomplishments have been considerable this year, our aspirations for the future are ambitious. These are exciting times at CCIS! With your support, we look ahead with great confidence. Thank you again.
